ABOUT THE BOOK

A faux textbook that teaches real skills. The only school where balancing a broom on your face, flipping an oven mitt, and turning a towel into a chicken can land you on the honor roll.

Part comedy book, part practical training manual, The Academy of Unusual Skills teaches more than 100 strange, silly, oddly impressive tricks using everyday objects, from coin snatching and card throwing to hat tricks, snack stunts, science illusions, juggling, and balancing.

Written by professional comedian, stunt performer, and three time Guinness World Record holder Matt Baker, it combines step by step instructions, faux academic nonsense, and over 350 illustrations.

For curious kids, bored adults, and teachers looking for genuinely fun activities.
